REISSUE APPLICATION DECLARATION AND POWER OF ATTORNEY BY INVENTOR(S)

As a below named Inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name, I believe I am an original, first, joint inventor of the subject matter that is described and claimed in letters patent number 5,559,995, granted on September 24, 1996, and for which invention I solicit a reissue patent on the invention entitled "METHOD AND APPARATUS FOR CREATING A WIREFRAME AND POLYGON VIRTUAL WORLD," the specification of which

☐ is attached hereto.

☒ was filed on September 23, 1998, as reissue application number 09/159,509 and is amended in the Preliminary Amendment submitted herewith.

☐ I hereby declare that there is no assignee for this application.

**STATEMENT OF INOPERATIVENESS OR INVALIDITY
OF ORIGINAL PATENT UNDER 37 C.F.R. § 1.175**

I believe the original patent to be

☒ partly

☐ wholly

inoperative or invalid by reason of (37 C.F.R. S 1.175(a)(1)):

(check all items that may apply)

☒ a defective specification

☐ a defective drawing

☒ the patentee claiming more or less than the patentee had a right to claim in the patent.

NOTE: At least one error must be relied upon as the basis for the reissue. 37 C.F.R. § 1.175(a)(1).

Applicants note that a change or departure from the original specification or claims represents an "error" in the original patent under 35 U.S.C. 251. One such "error" in the original patent relates to the specification. Filed with this declaration is a Preliminary Amendment which corrects a number of "errors" in the specification. In particular, in column 2, line 31, the phrase [the SGI] should be changed to the SGI workstation--. In column 3, line 5, the phrase [fiat tree] should be changed to flat tree--.

Another "error" relates to the patentees claiming more or less than they had a right to claim in the patent. Filed with the reissue application were new claims 10-108, at least some of which have a different scope than the originally issued claims, and that cover inventions that were not completely covered by the original claims. The differences in scope between the new claims and the old claims represent "errors" in the original patent.

For example, old independent claims 1 and 8 represents "errors" because the patentees claimed less than they had a right to claim in the original patent. Old claims 1 and 8 include the following language: "for selecting a first edge of [the] first virtual object and for selecting a second edge of [the] second virtual object." New independent claims 10 and 46 do not contain this language.

Another error in old independent claims 1 and 8 is the language "joined at an intersection of the first and second edges." New independent claims 10 and 46 do not contain this language.

Yet another "error" is corrected by new claims 46-57, which are directed toward a memory medium. There are no memory medium claims recited in the original patent due to the insufficiency of the original claims.

Applicant(s) believe that the errors listed above, and all other errors which are being corrected, up to the time of the filing of this reissue declaration, arose without any deceptive intention on the part of the applicant(s). 37 C.F.R. § 1.175(a)(2).

NOTE: For any error corrected not covered by this declaration applicant must submit, before allowance, a supplemental declaration stating that every such error arose without any deceptive intention on the part of the applicant. 37 C.F.R. § 1.175(b)(1).
